

# Aem Final Project Documentation

By Priyanka Ravi

## Introduction

This document provides a structured step-by-step guide for creating of the AEM Author portfolio website, detailing its pages, features, and functionality.

## Project Structure/ Flow

The website consists of the following pages:

- **Home Page** – Main page with clickable links.
- **About Me Page** – Author details.
- **Contact Me Page** – Contact information.
- **Book Page** – Book covers with clickable details.
- **Awards Page** – Lists book awards.
- **Social Media Contact Page** – Links to social media profiles.

## Step-by-Step Guide to Website Creation

### Step 1: Setting Up AEM

1. Log in to Adobe Experience Manager (AEM).
2. Go to **Sites > Create > Page**.
3. Choose a template (e.g., Basic Page, Editable Template).
4. Name your page (e.g., Home, About, Contact, Books, etc.).
5. Click **Create & Open**.

☐ Override:

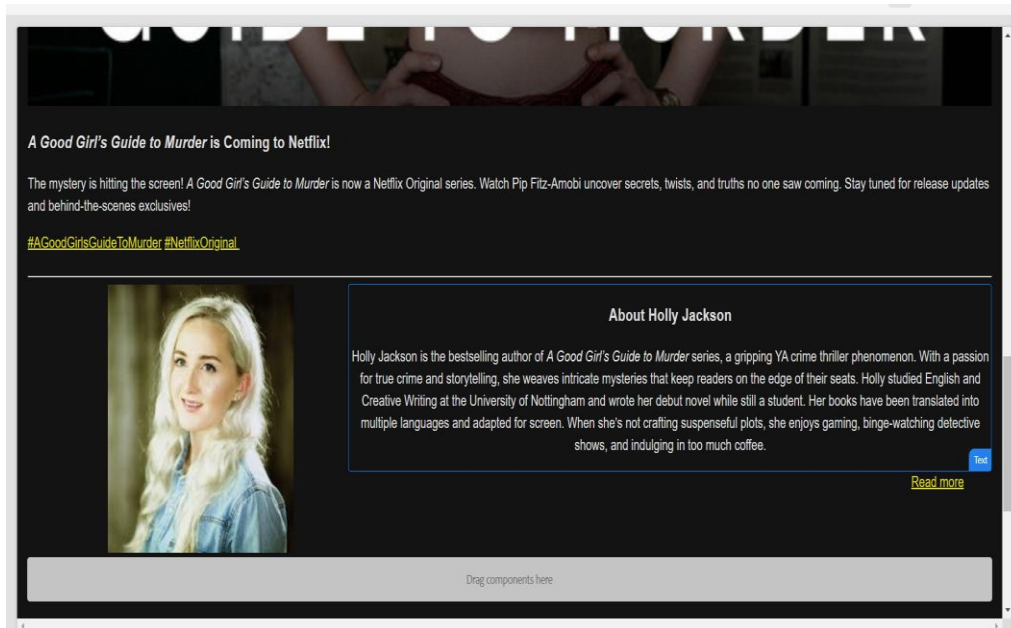

**HTML ID**

ID

## Step 2: Creating the Home Page

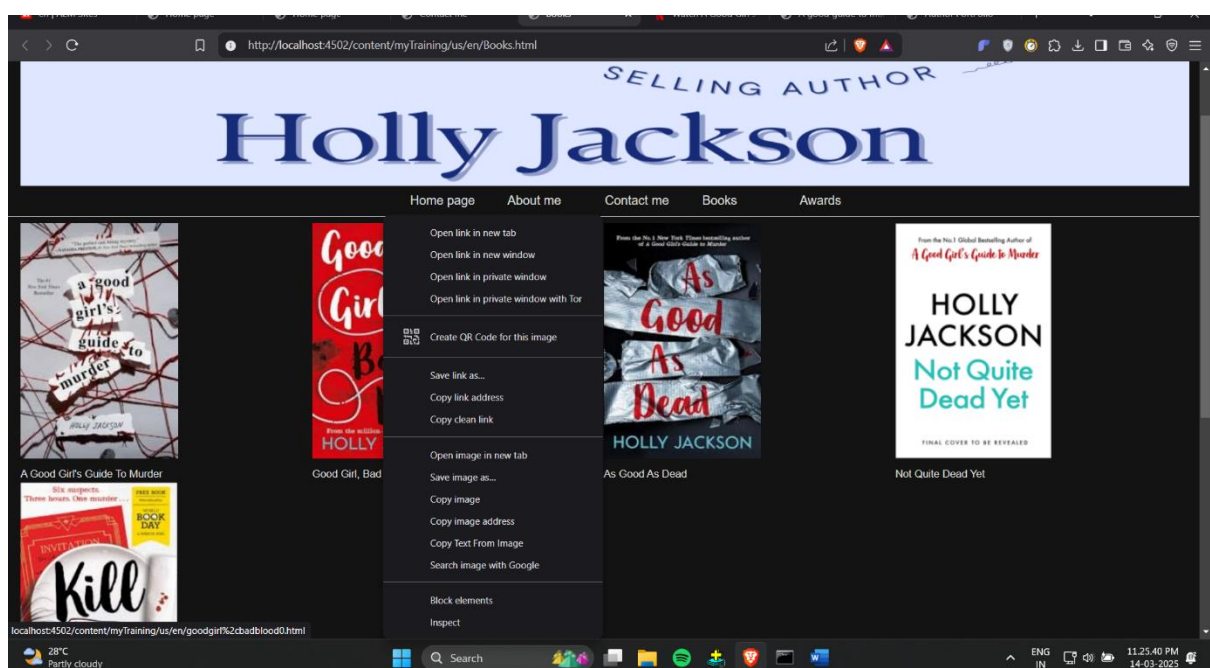

1. Open the **Home Page** in AEM Editor.
2. Drag and drop the **Text** component to add a title.
3. Add links for navigation (e.g., “#AGoodGirlsGuideToMurder,” “#NetflixOriginal”).
4. Save and publish the page.

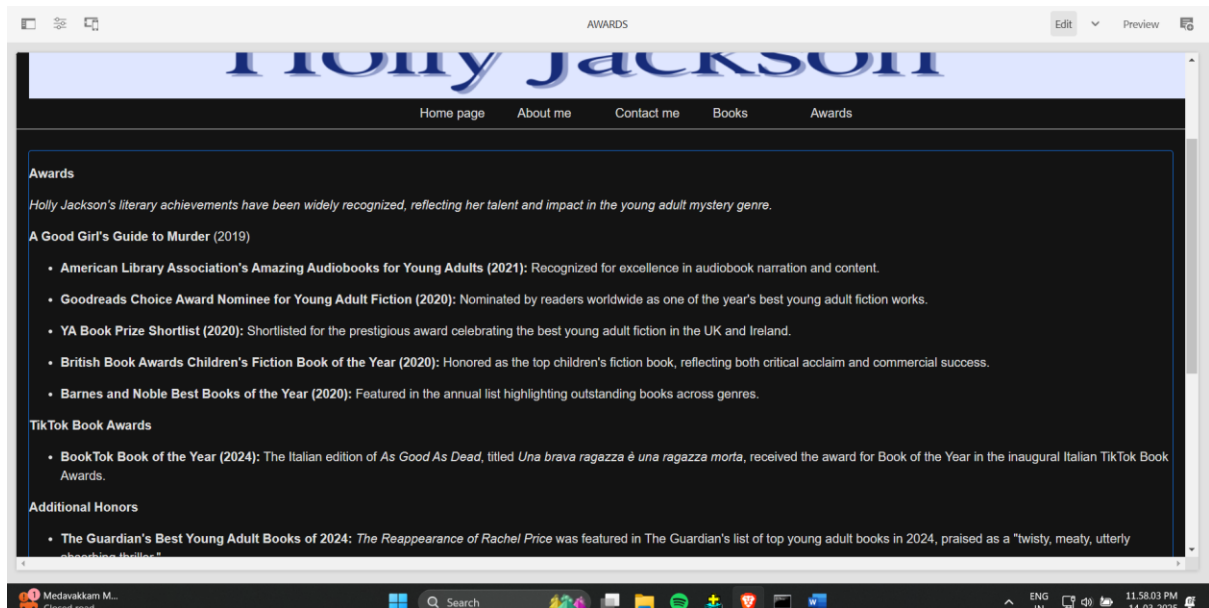

### Step 3: Adding the Book Page

1. Create a new page named **Books**.
2. Drag and drop the **Image** component to add book covers.
3. Use the **Hyperlink** option to redirect each book cover to its respective details page.
4. Save and publish the page.

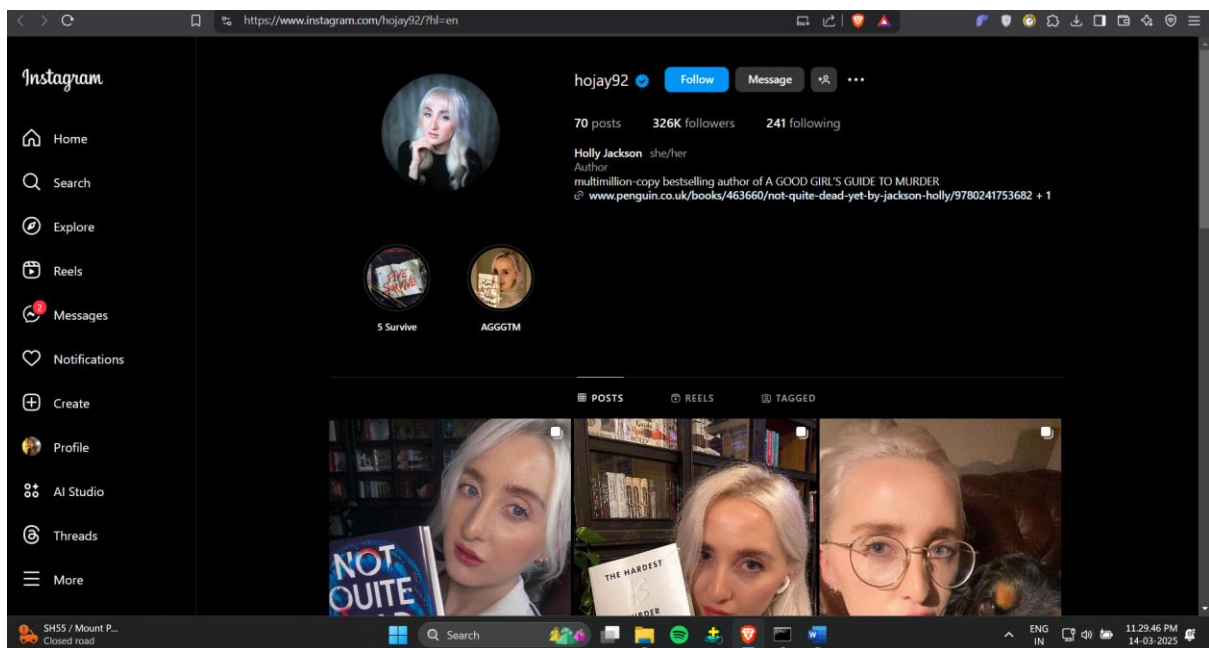

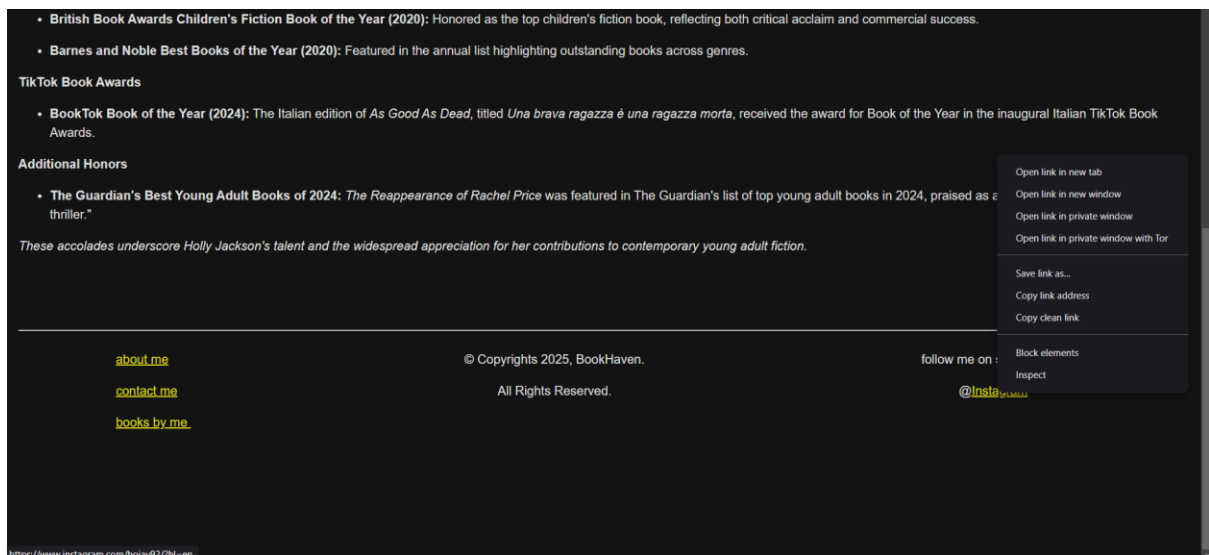

## Step 4: Creating the Awards Page

1. Create a new page named **Awards**.
2. Drag and drop a **Text** component to add award details.
3. Format the text to highlight key achievements.
4. Save and publish the page.

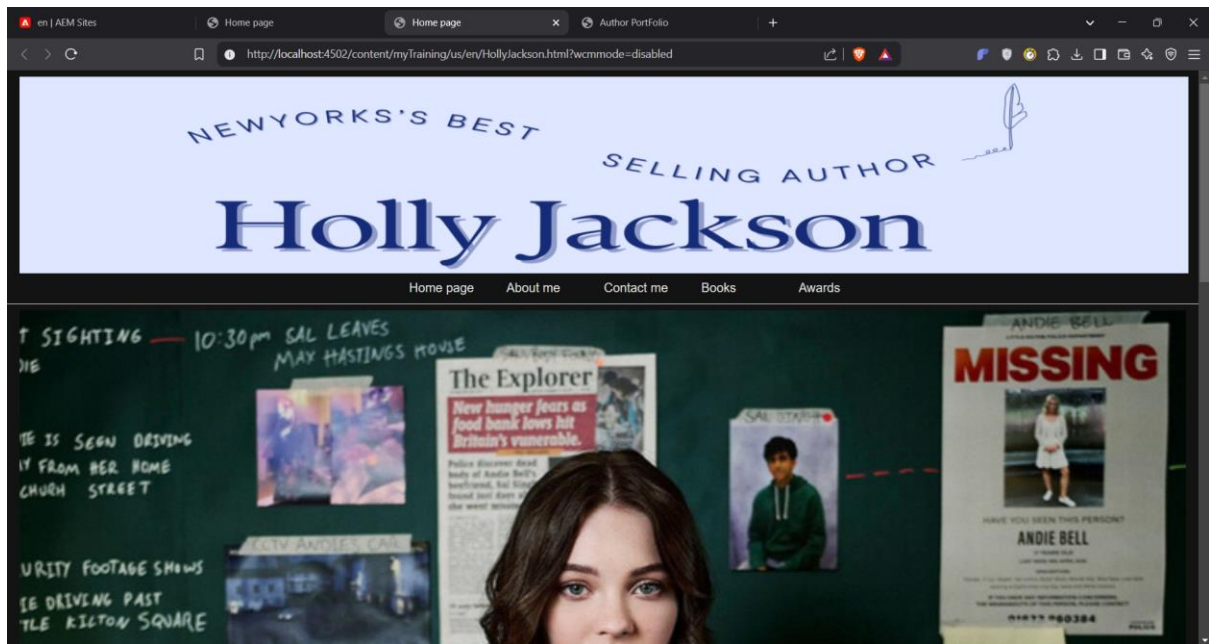

## Step 5: Adding Social Media Links

1. Create a new page named **Social Media**.
2. Drag and drop **Image and Button** components.
3. Link each button/image to the author's social media profiles.
4. Save and publish the page.

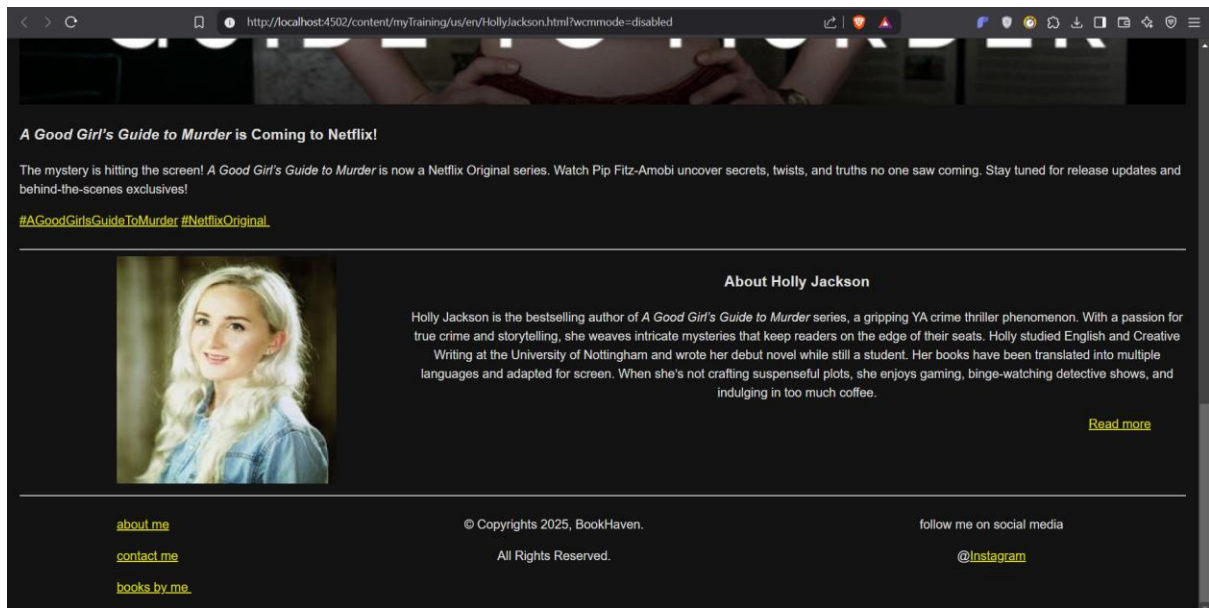

## Deployment & Testing

1. Click **Publish** for all pages.
2. Test navigation by clicking links.
3. Ensure external links redirect properly.
4. Verify that images and components are displayed correctly

## Conclusion

This step-by-step guide explains how to create an AEM website with book listings, navigation links, and social media redirections. Future improvements may include UI enhancements and additional interactive elements.
